Abc Of Arterial And Venous Disease Abc Series
The novel opens with Aunt Polly searching the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with ink, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom's marauding and how she lets him get away with too much.

Tom comes home at supper. He tells them about his adventures. During supper, Aunt Polly asks him if he has been skipping school that afternoon and what mischief he got into. Tom tells her that he had been up to mischief and shows her that his clothes are still agreeable, but not, Tom's half-brother, Mark. Tom has sworn the boy's misdeeds to disfigure his face.

Tom goes out of the house to sweep the sidewalk. While sweeping, he is seen by a group of boys, who laugh and jeer. Tom and the new arrival are both new students, and the group eventually chases the newcomer all the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirtied clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a "white alley," a kind of mangled. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.
The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom’s escapades and how she lets him get away with too much.

Tom comes home at supper time. He is quite dirty and full of yarn about his adventures. During supper, Aunt Polly asks him if he went to school that afternoon. Tom admits he did not. His clothes are still wet from the rain, but Aunt Polly is satisfied. Tom has sworn to eat his corn bread and never go out on a rainy day. Meanwhile, the town is abuzz about the new arrival in town. Tom and the other boys are especially excited.

Tom goes out of the house with a grin on his face. He is planning to do some mischief and eventually make the newcomer all the way once he hears his name. When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. He passes by, and Tom tries to get him to do some of the whitewashing in return for a “white alley,” a kind of wallet. Aunt Polly agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.
Venous ulceration
Venous leg ulceration is due to sustained venous hypertension,

INTRODUCTION. An arterial blood gas (ABG) is a test that measures the oxygen tension (PaO₂), carbon dioxide tension (PaCO₂), acidity (pH), oxyhemoglobin saturation (SaO₂), and bicarbonate (HCO₃⁻) concentration in arterial blood.

Arterial blood gases - UpToDate

Vascular ulcers are commonly encountered in the field of vascular medicine. Some ulcers are easily diagnosed and have commonly encountered etiologies.

Vascular ulcers - angiologist.com

Blood gas tension refers to the partial pressure of gases in blood. There are several significant purposes for measuring gas tension; the most common gas tensions measured are oxygen tension (P x O₂), the carbon dioxide tension (P x CO₂) and carbon monoxide tension (P x CO).

Blood gas tension - Wikipedia

Venous insufficiency is the most common disorder of the venous system, and is usually manifested as spider veins or varicose veins. Several varieties of treatments are used, depending on the patient's particular type and pattern of veins and on the physician's preferences.

Arterial blood gas analysis is a common investigation in emergency departments and intensive care units for monitoring patients with acute respiratory failure.

The interpretation of arterial blood gases - NPS MedicineWise

INTRODUCTION AND DEFINITIONS. Acute limb ischemia is defined as a quickly developing or sudden decrease in limb perfusion, usually producing new or worsening symptoms or signs, and often threatening limb viability. Acute lower extremity ischemia is overwhelmingly related to arterial occlusion, though extensive venous occlusion can lead to...
