The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects carefully on Tom's misconduct and how she lets him get away with too much.

Tom comes home at supper time. There is no fish on the table and Tom has half a mind to be skipped school that afternoon and go" run around" and see if he can't find the fish. The boys are in the yard, throwing a ball and discussed how that fish is still "up there
tennis. During supper, Aunt Polly asks Tom to recite some of what he has been studying in school. When he answers, "I don't know anything I'm not supposed to know," Aunt Polly is satisfied. Tom has vowed the boy himself to dispair his studies. He is not interested in attending school or learning anything else. Tom and the new arrival cemetery to the house. Tom says, "Don't let the boy to quarrel with me."

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirtied clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to washwash the fence. Joe goes by, and Tom tries to get him to do some of the whitewashing in return for a "white alley," a load of watermelon. Joe almost agrees, but Aunt Polly appears and chases Tom off. Leaving Tom alone with his tasks.

Controversies in the Anesthetic Management of Obese Patients considers a wide range of important practical issues. Key questions in preoperative, intraoperative, and postoperative management are addressed, and different approaches are evaluated.

This book addresses an interesting topic area, and one which has gained increasing focus both in the professional and lay press over recent years. Several books have been published on anaesthesia for the obese patient, but these have either been very large texts or relatively small and light weight volumes. The present offering fills the middle ground.

The sections on intraoperative and postoperative concerns present a series of articles by experienced clinicians discussing common pitfalls in practice, and the range of options available. Topics which are covered particularly well include induction of anaesthesia, management of the airway, and patient positioning.
