The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom’s mischievous and how she lets him get away with too much.

Tom comes home at suppertime. He has nothing to report except that he has been skipped school that afternoon and spent it whistling. While wandering the streets of St. Petersburg, Tom and his friend Huckleberry Finn are discovered, and eventually choose the newcomer as the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a “half a day,” a kind of miracle. Jim almost agrees, but Aunt Polly appears and chooses him off, leaving Tom alone with his task.
The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom’s naughtiness and how she lets him get away with too much.

Tom comes home at suppertime and his mother tells him that he will be whipped if he has committed any more misdeeds. He is not surprised. During supper, Aunt Polly tells him that he was not to be skipped school that afternoon and now he will be punished for it. Tom is not impressed. Aunt Polly is satisfied.

On the way home, Tom and the new arrival are seen playing in the street. Aunt Polly is not impressed. Tom has smirks the day he joins the crew.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his soiled clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a “white alley,” a kind of mite. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.
Vacuum deposition is a family of processes used to deposit layers of material atom-by-atom or molecule-by-molecule on a solid surface. These processes operate at pressures well below atmospheric pressure (i.e., vacuum).

Physical Vapor Deposition (PVD) is a collective set of processes used to deposit thin layers of material, typically in the range of few nanometers to several micrometers. PVD processes are environmentally friendly vacuum deposition techniques consisting of three fundamental steps (Figure 1):

- Ion plating (IP) is a physical vapor deposition (PVD) process that is sometimes called ion assisted deposition (IAD) or ion vapor deposition (IVD) and is a version of vacuum deposition.

CdS arrays, nanowires, and nanocombs were selectively prepared through an atmospheric pressure chemical vapor deposition (APCVD) process with CdCl₂ and S as sources.
