The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom’s mischief and how she lets him get away with too much.

Tom crosses home at supper to see if his father has any more news about his adventures. During supper, Aunt Polly tells Tom that he will be skipped school that afternoon and must clean up the barn and show her that his collar is still shiny from Aunt Polly’s new sewing. Tom.jet, Tom’s half brother, drops himself to dispose of his own clothes. While wandering the streets of St. Petersburg, Tom and the new arrival come to the bank of the Mississippi and eventually choose the scene of all the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a “white alley,” a kind of waxed horn. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his labor.
Prostate cancer is the most common male cancer in B.C. (with the exception of non-melanocytic skin cancer), relatively little is known concerning its etiology.

Prostate cancer is the most frequent male cancer. Since the median age of diagnosis is 66 yr, many patients require both geriatric and urologic evaluation if treatment is to be tailored to individual circumstances including comorbidities and frailty.

In retrospective studies, 68 Ga-PSMA-11 positron emission tomographic (PET) imaging improves detection of biochemically recurrent prostate cancer compared with conventional imaging.

In the early stages, there may be no symptoms. Sometimes prostate cancer is found coincidentally after surgery for benign (non-cancerous) prostate enlargement.

Men who have prostate cancer that has spread to other parts of the body (advanced prostate cancer) might get some of the problems we describe on this page.

Explore the latest in prostate cancer, including recent screening guidelines and advances in management of localized and metastatic disease.

There are two main types of disorders associated with the prostate. These disorders include benign prostate diseases and prostate cancer. Benign prostate diseases include two conditions which are:

Living with hormone therapy: A guide for men with prostate cancer. This booklet is for men who are having hormone therapy for prostate cancer, their partners and families.
